All of our products are intended for outdoor use, and so don't require any care or maintenance to last for many years (if not centuries). The only exception is our fountains, which should be drained and the pump removed, if freezing temperatures are expected.

Over time, our stone products will develop a natural patina of moss and lichens as they weather. If desired, this surface patina can be removed with a pressure washer. We recommend you never use harsh chemicals, acids or bleach on stone.

Carefully carved by human hands, making each piece unique. Guaranteed by Mother Nature to last a lifetime.

MARBLE

Marble is a metamorphic rock that begins life as limestone and over millions of years of heat and pressure the limestone becomes marble. Depending on the amount of minerals present in the stone, veining can be either very minimal - thin, delicate lines or dramatic - large swaths of colors that can seem almost like smoke within the marble.

Marble is very popular because of the beautiful colors and patterns available. One of the most unique aspects of marble is that it's translucent, meaning you can see past the outer surface. Although no marble is completely transparent, you can often see through at least a few millimeters of the stone, which is one of the reasons it has been used extensively in decor.

Stone Age Creations, located in Ohio, has been designing exceptional natural stone statuary for over 20 years. Trust that when you buy a product from Stone Age Creations, it is second to none.
